- Powerful reports
- Container labels (NFPA, HMIS, WHMIS & DOT)
- Binder creation, updating and editing
- Archiving outdated MSDSs
- Authoring New MSDSs
- Import and export information
- System Requirements
- Testimonials

Multiple Administrators

Centralized database allows multiple administrators to distribute the workload and share resources.

- Reduces MSDS and chemical inventory management for unlimited locations responsible for MSDS
- Measured time and savings
- Multi-level administrator and password protection

- United multiple locations permitting MSDS management to be shared by administrators at multiple sites

**Example: if an administrator in one department adds an MSDS for Acetone, then a second administrator in another department will not need to add the same MSDS. It has already been added across the organization and is available to all departments.*

This results in centralized information to choose from and helps balance HAZCOM compliance across your entire organization.

Unlimited Electronic MSDS Access

MSDSpro Enterprise provides unlimited employee access to MSDSs and related information via your company's intranet.

- Employees connected to your company network have instant access to your MSDSs
- Unlimited employee search, view and printing of MSDSs and labels
- Pre-configured intranet component for instant setup
- Employee user interface takes only minutes to learn
- Allows employees to request new MSDSs

Search features include product name, manufacturer, locations, CAS number, ingredient, custom fields and MSDS IDs.

Internet Downloads:

Leverage the power of the Internet with Enterprise by importing your MSDSs directly from the manufacturer.

- Locate the MSDS you need on the manufacturers web site
- Import it into MSDSpro and add needed product data
- Instantly available to employees with the MSDSpro search browser
- Saves time and money across your entire organization

Automatic MSDS Updates at No Charge

Easy access to MSDSs updates at the touch of a button. Eliminate the problem of updating and maintaining your MSDSs

- Update your MSDSs anytime you like for FREE
- Click the update from Internet button and instantly capture the most current MSDSs available
- Updates are instantly available to your employees
- Archive the older MSDS for "Cradle to Grave" OSHA and WHMIS compliance

Total Chemical Inventory Management:

Full-featured total chemical inventory management

- Track and report chemical details and locations (unlimited)
- Produce the SARA Title III/Tier 2 report automatically
- Track chemical quantities and thresholds (TPQs)
- Bar code scanning for updated chemical inventories
- Instantly generate multiple chemical inventory reports

Are you responsible for updating chemical inventories in multiple locations?

Distribute your chemical inventory workload with **Web Inventory Manager (WIM)**.

- Real time inventory
- User level security by location
- Printable inventory worksheet
- Add, remove or change inventory directly from the web
- Users can update all of the information required for Tier II reporting (including facility information)
- Printable reports such as Last Reviewed By and Dates
- Automatically create product records from new MSDS requests

Accurate tracking of chemical products by location, ingredients, weight percentages and regulatory flags help keep your entire chemical inventory compliant, easier to update and faster to report.

Powerful Reports

Powerful reports put critical product, inventory and regulatory compliance data at your finger tips. Choose one of the many pre-built reports to quickly access your data:

- Product and inventory
- Web Inventory Manager (WIM)
- Chemical & Ingredients
- Regulatory

Create, save and export virtually any report you need with MSDSpro's **Custom Report Generator**

- Robust and easy to use
- Create custom reports from thousands of fields
- Export to access, crystal reports, excel and the most popular programs
- Take control of your information

Container Labels (NFPA, HMIS, WHMIS & DOT)

Right to Know (RTK) label printing

- NFPA - National Fire Protection Agency
- HMIS – Hazardous Material Identification System
- WHMIS – Workplace Hazardous Materials Information System
- DOT Shipping Labels Department of Transportation

Print secondary container labels in various sizes from large containers down to small spray bottles.

Binder Creation, Updating & Editing

Creating binders for your employees is fast and easy with MSDSpro Workflo!

- Instantly generate binders by department or location
- Easily create paper or electronic PDF binders of your MSDSs
- Fully indexed
- List hazards, PPE, emergency contacts and etc
- Save on a CD
- Print binders on paper or keep them on your PC desktop for convenient electronic access

Easily Archive Outdated MSDSs

- MSDS archiving and compliance are easy with MSDSpro Workflo
- Simply select the products no longer in use, click a button and they are instantly removed to the archive
- Archived MSDSs no longer available to employees via the search browser
- If the same product re-enters your inventory just reverse the process
- Meets the document retention requirement for “Cradle to Grave” OSHA and WHMIS compliance

Author New MSDSs

Author and publish your MSDSs in real time on your network with MSDSpro Enterprise!

- Professional, easy to read 16 Section ANSI formatting
- Powerful phrase library for easy “drag & drop” composition
- Over 400 ANSI phrases included
- PDF publishing, no Adobe® license required
- Custom tracking and MSDS update tools
- MSDS version control with global changes for mass updates
- Optional Spanish and French phrase libraries available
- Eliminate the frustration of authoring MSDSs

Import and Export Information

MSDSpro Enterprise keeps your information flowing even outside of MSDSpro's chemical inventory and MSDS management.

- Information can be imported and "mapped" from existing spreadsheets and databases
- Data can be exported from MSDSpro for use in reporting and other systems
- Fully ODBC compliant
- You own and control all your data and MSDSs
