## MOBILE DATA COLLECTOR

FINALLY! An answer to the problem, "How do we inventory our chemicals quickly and efficiently?"

### The Requirement:

A current chemical inventory is the foundation of an employer's compliance with its Hazardous Communication program and Right-to-Know requirements.

### The Need:

- Identify all hazardous chemicals currently onsite
- Conduct a physical chemical inventory by location
- Identify those chemicals eligible for disposal
- Locate unauthorized chemicals throughout the facility
- Ensure MSDSs are available for all identified chemicals

### The Challenge:

Capturing and maintaining your company's current chemical inventory is a challenge. The Hazardous Communications Standard requires the employer to identify the physical locations of all hazardous chemical products used throughout its facility.

### The Solution:

The MSDSpro Mobile Data Collector (MDC) is a lightweight portable inventory capture device. Use the MDC to move throughout your facility and QUICKLY capture and record chemical names, manufacturer information, physical locations and barcode IDs, when available. Record chemical container sizes and quantities too!

### The Details:

The MDC uses a special version of the MSDSpro software application, so existing MSDSpro users will be familiar with the MDC screen. Set up physical locations prior to conducting the inventory and/or add them as you go. Simply select the physical location (typically a storage room) and begin your physical chemical audit!

### Mobile Data Collector Hardware Specifications:

- |                                     |                                |
|-------------------------------------|--------------------------------|
| MSDSpro UltraMobile Software        | Microsoft Windows 7            |
| Fujitsu Lifebook Tablet PC*         | 1 Year Manufacturer's Warranty |
| 10.1" LCD display with touch screen | 1D Laser Barcode Scanner       |
| 2 GB SDRAM Memory                   | 6 cell high capacity battery   |
| 160 GB Hard Drive                   | Carrying case and stylus       |

Features and equipment are based on availability and subject to change without notice.

### Mobile Data Collector Software Details:

- Designed for small screen interface
- Extra large font for enhanced viewing
- Search by Barcode, Product Name, Part Number, Manufacturer Name
- Manufacturer Name type-ahead capability when adding a Product
- Syncs with MSDSpro for direct updates to chemical inventory
- Bar code at the Product and Container level
- Track SARA Tier II container information (Quantity, Size, Units, Type, Pressure and Temperature)
